Face Up Tutorial (image heavy) ~by myufish - [myufish](#) - Today 01:47 AM

i havent seen any face up tutorial here so far..(or i might have missed it) But I want to share how i do my face ups for anyone who might want to try their hands on customizing their dollies ^^

Customizers have different ways in doing face ups but here's how i do it.

First of ... Materials

Msc,zoukeimura powder spray (sealers), brushes, acrylic paints, gloss, chalk pastels, paint palette , clean water , paper towels and magic eraser (which wasnt in the pic) and of course a sanded/cleaned dolly head.

step 1.

Spray your cleaned dolly head with MSC . It

makes painting and blushing easier 🍷

EYEBROWS

a) with paint thinned with water, make a very light outline of how you want your doll's eyebrows to be . You could always remove any mistakes with magic eraser.

b) When you're satisfied with the outline , you can paint a darker color on top of it. Following the outline make simple brush stokes using a fine brush.

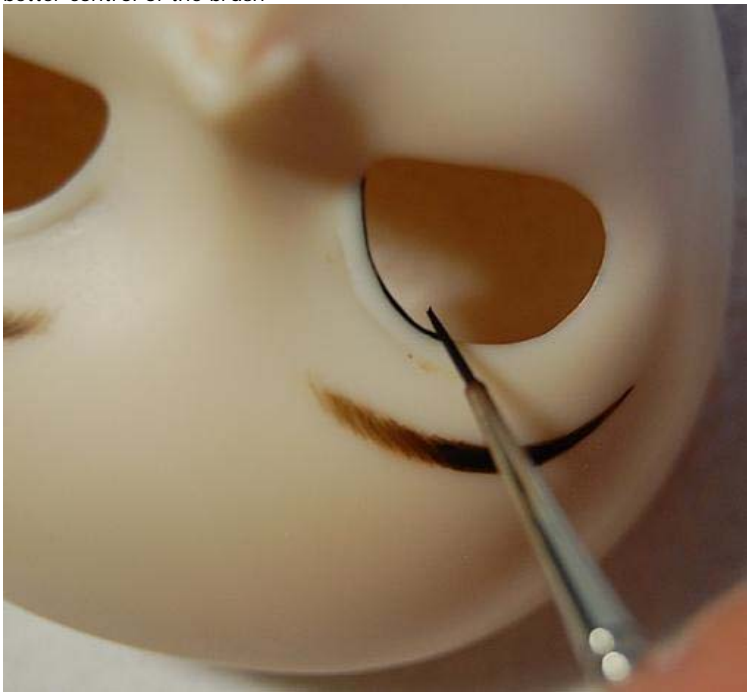

--build up the color slowly. letting the paint dry first in between layers.

Eyelashes.

a. With paint thinned with water , paint the outline of your dolly's eye using the side of your brush instead of the tip. It gives you a better control of the brush

b. build up the colors again . letting the paint dry in between layers . (it's better than putting thick paint on the doll) . You can now put on lashes ...make them very light at first since it will be your guide for painting longer lashes later. Thinned paint works better in making delicate lashes.

eyelashes progress pics:

c) Seal your dolly again with MSC at this point.

Blushing:

a) make fine powder using a craft knife .

b) with a big brush dab a small amount of chalk. remove the excess powder by rubbing the brush on a paper towel before blushing your dolly (this makes for an even blush)

c) when you are satisfied with how your dolly looks, seal it with MSC or Zoukeimura

Glossing.

a) Gloss the lips and the tear ducts. Sometimes i gloss the top of the eyes (between the eyecrease) And let it dry 🤖

Finish face up 🤖
